

I hope this rather convoluted way of doing *contact me* will stop the phishers from finding my email but I hope that real humans that want to contact me can work it out. This is my ey mail – there are no caps or spaces or punctuation. My name johngorman without caps or spaces. Then the four digit number two thousand seven hundred and fourteen. Then the usual at sign and its all at the well known gee mail dot com. Good luck with all that!
